Education

Computer Programming & Analysis Advanced Diploma   **September 2018 - Present**
Seneca College – Toronto, Ontario

Projects

Android App Clones (WhatsApp, Uber, Snapchat)
Environment: Android Studio, Java, Kotlin
- Learned the Java language and a bit of Kotlin by creating mobile app clones of popular apps.
- Used beginner to advanced Java practices as well as tools to design layouts for the apps and being able to provide cloud storage using tools like Google Firebase.
- Practiced design skills by building the app layout and adjusting design elements to suit the preferred vision for the app.

Assembly Line Application
Environment: MS Visual Studio, C++
- Coded an application that accepts an order for computer parts and fills the order while updating inventory.
- Designed using a mixture of modern and older C++ practices to be able to have an understanding of the entire language.

Company Employee Website

Environment: MS Visual Studio Code, JavaScript, CSS3, HTML5, JSON, Node JS, Express JS, Handlebars JS, Git, jQuery, Postgres, MongoDB, Heroku

- Coded a webpage using JavaScript, JSON, Handlebars JS, and jQuery, that displays a company page for employees.
- Used database tools such as Postgres and MongoDB to store employee and department info, as well as be able to view, update, and delete that info at any time.
- Created a proper login system for employees with proper password encryption.
- Made changes to code when necessary using Git to keep track of updates, as well as hosting the site on Heroku.

Work Experience

Plant Operator   **January 2017 – September 2018**
Stella Jones – Stouffville, Ontario
- Ran and maintained pressure treating plant as the sole independent operator.
- Adhered to and surpassed extremely tight deadlines becoming the highest producing plant in Canada.
- Worked with custom built computer program to treat wood while reporting bugs and recommending changes to the developer.

Fibre-Op/Network Cable Installer   **August 2016 – January 2017**
Telecon Canada – Scarborough, Ontario
- Worked in a small team to install fibre-op and network cables into houses and office buildings per design requirements.
- Communicated with customers to meet their installation and design needs and modified plans if required.
- Promoted to be the safety and first aid leader for the team.

Lead Hand Scaffolder   **February 2014 – January 2016**
Panels & Pipes – Fort Mackay, Alberta
- Worked both as a small team and independently to complete   projects within tight deadlines.
- Responsible for ensuring the safety and efficiency of the team at all times as the lead hand.
- Coordinated with other trades on site to make sure there were no issues.
- Frequently required working long overtime hours for on call emergency fixes and repairs.

Warehouse Supervisor   **February 2008 – July 2016**
Home Hardware – Jeddore, Nova Scotia
- Supervised a small team of 2 – 3 people to ensure orders were being completed correctly and on time.
- Responsible for all training of any new employees.
- Ensured warehouse stock was always up to date and depleted stock was ordered on time.
- Worked with customers to make sure their needs were met and made recommendations when necessary.
